

LaunchLabZaio Bootcamp: WoBots

Team member one: *Tshepiso Moloko*

**Complete:**

- Created modal or form in four sections
- Section1: Heading and page aligned with body(comfortable with tags)
- Section2: Using buttons and changing style. Still to complete modifying them into
- Section3: Modifying the AddtoCart button and only managing to add a default button but styles not changing.
- Section4: managing
- Expected completion 20 January 2020 due to
- Overall Assignment incomplete but uploaded with the comments of changes still being made

**Planned to be complete:**

modify labels to functions

Challenging importing some files that change styles resorted to javascript

Expected to be complete by 21/01/2020, 10am

**Challenges:**

- Importing some of the html files and not entirely sure when they are called by the
- Using Heroku
- TIME was a huge factor in that being new to the language. Suggestion to have the calendar of the work that will be done provided before the Bootcamp starts.

**Feelings about the process thus far:**

- Team selection and grouping should be managed by the facilitators in order to have strong coding background to be paired with weaker counterparts.
- A week was enough for me to get through the content online and understand features. But implementation takes longer. So researching, reading, watching online, practice and then implement was a lengthier process. Advice to have the calendar provided sooner.

Team member one: *Sesethu Tulumani*

**Complete:**

- Created my html and css page.
- Aligned my page in the centre.
- Scratched out the previous price and put a bold on the new price.
- Added ratings image next to the number of reviews and orders.
- Added the 'Add to cart' button.
- Linked the add to cart button to another page which I am currently making a pop up.

**Planned to be completed:**

Expected to upload completed assignment by Tuesday (21/01/2020)

**Challenges:**

**Feelings about the process thus far:**

- Expected to learn something different from school.
- Wasn't ready for lectures on Monday's
- Dependency to do the work individually
- Pressure on submission and individual work
- Wifi limitations and LaunchLab far from home.
- Feels like it's a competition

Team member one: *Ireen Semanya*

**Complete:**

- Managed to have the color changes feature.

**Planned to be completed:**

- Expected completion day for Week 1 Deliverable is Tuesday (21/01/2020)

**Challenges:**

- Script for the carts functionality
- Time was a factor but Ireen clearly communicated with clash of honors submission and that their first deliverable has been started(19/01/2020) and will be completed and uploaded.

**Feelings about the process thus far:****OVERALL Feedback Group Feedback& Suggestions:**

- Lack of communication and use of available resources by the group
- The capacity for team members to focus on this particular Bootcamp. Due to time when the program runs there's prone to be split focus within team due to other commitments at this time of the year.  
It could be advisable to have the program run on holidays.
- Team mates reluctant to use the self-teaching opportunity
